360 DEGREE LEARNING

**GD GOENKA PUBLIC SCHOOL,
SARITA VIHAR - FOR A BRIGHTER FUTURE**

Learning is a lifelong phenomenon transcending the four walls of the classroom. While the pandemic made it imperative to digitize education, for them at GD Goenka Public school, Sarita Vihar, the transition from offline to online learning both synchronous and asynchronous on the virtual platform became the only route and viable way to keep learning continuous and constant.

However, this paradigm shift is here to stay. As the students of classes 9-12 have come back to real classroom, the dimension of virtual learning is going to continue. This blended learning saw a complete realignment of the school curricula and the best of both the platforms to churn out the optimal collaboration,

revitalizing classroom instructions. From the pages of text books, to three dimensional teaching aids and then transitioning to digital platform has ensured a complete perspective of the topic in hand. The students have been able to ideate, deliberate, collaborate and infer from their own learning curve. This experience of learning will stay with them forever. As part of the immersion program, the vast repository of learning material has become available for them and is just a click away, however the role of teacher here is to scaffold and realign the pedagogy for optimizing the best results. A well-rounded education apart from being holistic should also be well integrated. As their teachers practice cross domain linkage, a multi-dimensional and innovatively designed high bay space augments learning to higher levels where we bring art integrated learning for all disciplines.

Contextual, place based updated learning techniques keep students energized and eager to learn. Educators have to constantly review and reinvent the wheel and strategise, so that the learner is stimulated to further curiosity, zest and happiness to co create and construct knowledge. They have been mindful of the fact that there has to be a shift from knowledge acquisition to knowledge construction. The school focuses on design thinking in co-creating knowledge and producing our own

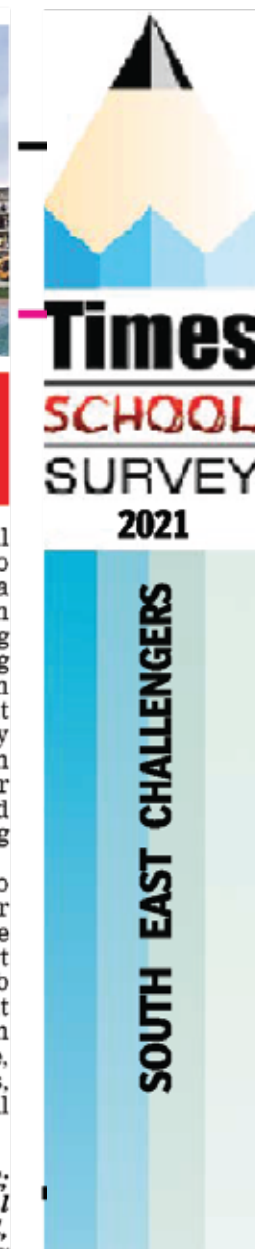

Tell me and I forget, teach me and I may remember, involve me and I learn
— Benjamin Franklin

proto types through experiential methods with tangible outcomes to reach Meta learning enhancing a sense of enquiry and growth within our students. Prescriptive learning as a norm is petering out. Refreshing their pedagogical model with dynamic curricula in alignment with the National Education Policy NEP 2020 which focuses on competency based learning rather than content based learning and has been the core fabric making learning inclusive and equitable

Education ultimately has to empower our students for a better tomorrow with higher cognitive skills. While it is an easy passport to employability and job opportunities, we have to see how it also leads to evolution of a human to have better values, discipline, technical, and behavioral skills, enhancing the social and emotional quotient.
