

**THEME:** Interhouse Mathematics Challenge

**DATE:** February 13, 2026

**CLASSES:** III - V

### EVENT REPORT

An Inter house Mathematics Challenge was conducted on Friday, 13.2.2026 . All the students from classes III to V actively participated in the event. The competition encouraged young learners to explore their creativity through Mathematics. Students were guided to create beautiful sceneries using geometrical shapes such as circles, squares, triangles, and rectangles. They thoughtfully incorporated different shapes to design landscapes, buildings, houses, trees, rivers, and other nature scenes. The activity helped them understand the practical application of geometrical concepts in a fun way. Each participant showcased originality and imagination in presenting their artwork. The classroom atmosphere was vibrant, cheerful, and filled with curiosity. It was truly a learning and joyful experience for all the students. The competition not only enhanced their mathematical skills but also boosted their confidence and creativity.
